WEB'LOG SLAVE MODE BLUE'LOG XM

Item no.: 557.011

Operate blue'Log XM as Slave from WEB'log Master

LICENSE DESCRIPTION

blue'Log XM can operate as Power Control Slave device and receive setpoints from a WEB'log Master. The license WEB'log slave mode activates this function on a blue'Log XM.

For more information regarding Master-Slave configuration on WEB'log please see the "Operating manual" from WEB'log which is available in the archive on meteocontrol Download section.

FEATURES

+ blue'Log XM devices can receive setpoints from a WEB'log Master
+ The license activates on blue'Log XM the same already existing WEB'log Slave features (Configuration of "Slave group", "Inverter sum" and "Fallback")

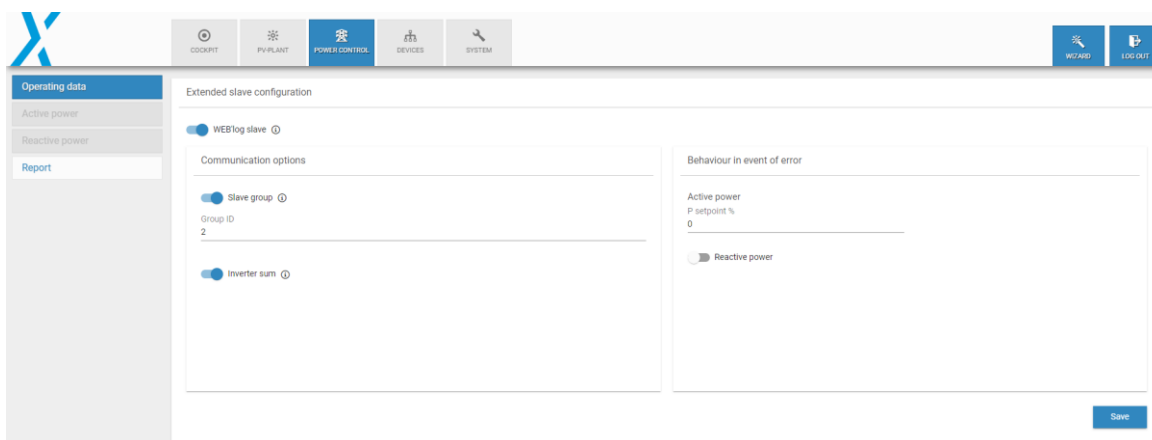

REQUIREMENTS

+ blue'Log XM
+ Firmware ≥ 15.1.8
+ WEB'log slave mode blue'Log XM license*

*The license is linked to a specific device. When ordering, please provide the 14-digit hardware serial number of the data logger.

CONFIGURATION

+ Configuration is done in the menu „Power Control – Operating data"
  ➢ The function can get activated via "Extended slave configuration"
